NEUTRIK

NA2-IO-DPRO

* DISCONTINUED *
Upcoming successors: NA-2I2O-DLINE, NA-2I-DLINE and NA-2O-DLINE (approx. October 2023)

The NA2-IO-DPRO is a 2IN, 2OUT breakout box designed to connect legacy audio equipment with the Dante® network. It features high-quality microphone preamps and 2 Dante® ports for either redundant setup or daisy chaining. Audio parameters are adjusted either by Neutrik's DPRO controller or a number of common control software.

All connectors are lockable and, together with the removable rubber protection, offer a reliable solution for tough stage conditions. With optional mounting brackets or a rack panel, the box can be mounted below tables, in floor boxes, racks or on a truss.

Features & Benefits

✓ Lockable audio and network connections

✓ Connect up to two analog line or mic signals to a Dante® network

✓ Connect AES/EBU signals to a Dante® network and provide an AES/EBU signal from the Dante® network

✓ Feed non Dante® ready amplifiers, speakers or mixing desks with signals from the Dante® network

✓ Primary and Secondary Dante® ports

✓ Setting of all audio parameters via the DPRO controller software. Yamaha CL/QL mixer, QSYS plug in and Crestron module

NEUTRIK

✓ Different mounting options (rack, truss, floorbox, table mounting)

✓ Requires a Power over Ethernet switch or a PoE injector (802.3 af/at/bt)
