CAS-FOCD-ADV

Fiber optic cleaning kit

Fiber optic cleaning kit content

- Case
- Hand microscope (200x magnification)
- opticalCON microscope adapter (allows microscopical front surface inspection of opticalCON DUO, opticalCON QUAD and LC connectors)
- 2.5 microscope adapter (for microscopical front surface inspection of 2.5 mm ferrules as used on ST, SC and FC connectors)
- opticalCON cleaning box (contains lint-free wipes, device is optimized for opticalCON fiber cleaning)
- 1.25 mm DRY cleaner (for opticalCON chassis connector cleaning; LC front surface dry cleaning possible)
- 2.5 mm DRY cleaner (for ST, SC and FC feedthrough connector cleaning; cable connector front surface cleaning possible)
- Fiber optic cleaning fluid (non flammable)
- The consumable material can be reordered.

The CAS-FOCD-ADV has additional space to upgrade the cleaning kit with MTP® dry cleaner FOCD-DCM and advanced measuring equipment like the handy PM-215 Pocket Optical Power Meter with the appropriate Light Source from OPTOKON.
