Connect even more legacy audio gear to your Dante network with Neutrik’s new NA2-IO-DPRO

Schaan, Liechtenstein, September 2019. The leading supplier of robust and reliable professional connectivity solutions for audio, video, and data, is pleased to announce the new 2-in, 2-out NA2-IO-DPRO Dante interface. NA2-IO-DPRO features two inputs switchable between Mic, Line, and AES/EBU signals plus two outputs switchable between analog Line and AES/EBU. Two Dante ports provide for either redundancy or device daisy chaining. With its small size, metal construction, and removable rubber protector, NA2-IO-DPRO offers a rugged, reliable solution that is well suited to a wide range of applications.

The NA2-IO-DPRO front panel provides two latching XLR inputs plus two XLR outputs. AES/EBU operation is seamlessly and independently auto detected for inputs and outputs. Using Neutrik’s free DPRO controller software for Mac or PC, +48 V phantom power can be applied; microphone preamplifier gain, pad, and high-pass filtering can be set per channel; and input channels can be linked for matched operation. Output channels can be muted or unmuted within the software.

The NA2-IO-DPRO rear panel provides primary and secondary Dante ports over Neutrik etherCON connectors. The secondary input can be configured for either redundant mode or Switched mode (for daisy chaining). When operating in Switched mode in conjunction with a 60 W PoE injector, up to eight devices can be daisy chained. Up to four devices can be daisy chained with a 30 W PoE injector.

NA2-IO-DPRO is AES67 compliant. Power must be supplied externally via either a PoE switch or a PoE injector per IEEE 802.3af/at, class 2 or no classification at 6W. With optional mounting brackets or a rack panel, the NA2-IO-DPRO can be mounted below tables, in floor boxes, in racks, or on the stage truss.
Florian Frick, Product Manager for Equipment, commented on the company’s new NA2-IO-DPRO. “The number one request we have received since releasing our first Dante adapter, NA2-IO-DLINE, last year was the inclusion of microphone preamps with variable gain. Secondly, our customers have requested an AES/EBU option. The new NA2-IO-DPRO offers both of those features while maintaining the compact, rugged, and versatile form factor of NA2-IO-DLINE. While NA2-IO-DLINE remains ideal for fixed-gain, analog-only applications, the wealth of analog and AES/EBU connectivity options offered by NA2-IO-DPRO will prove ideal for a wide range of users.”

The Neutrik NA2-IO-DPRO Mic, Line, AES/EBU I/O to Dante® Interface is slated to be available October, 2019.
Neutrik Group

Headquartered in Schaan/Liechtenstein, Neutrik AG is the world’s leading supplier of professional connector systems for the entertainment industry. The product range includes XLR connector systems, jacks and plugs, speaker connector systems, fiber optic connector systems, patch bays, coaxial plugs (BNC), industrial connectors and digital wireless solutions.

The Neutrik Group consists of subsidiaries in North America, Great Britain, Germany, France, India, Japan, Hong Kong and China. A network of exclusive distributors in more than 107 countries worldwide provides global sales, on-site technical support and optimum customer proximity.
